油烟中的油脂会与装在储油槽中的水混合，而干净空气则从排风口排出。每次更换烤盘、烤网时都要清洗储油槽。因考虑到烤盆、烤网会有部分油脂滴落到烤炉底部，所以我们为电线做了防护，专门用一个金属盖子盖住，防止油脂腐蚀电线。

The grease in the cooking fumes will mix with the water in the oil storage tank, while the clean air is discharged from the exhaust port. The oil storage tank should be cleaned every time the baking tray and baking rack are changed. Considering that some grease might drip to the bottom of the oven from the baking tray and the baking rack, we protected the wires by specially covering them with a metal lid to prevent the grease from corroding the wires.
